

GERARDO NÚÑEZ VALPUESTA

FULL-STACK ENGINEER | SVELTE, SVELTEKIT, TYPESCRIPT & TECHNICAL LEADERSHIP

Mexico (GMT-6) | Remote / Hybrid | +52 55 8442 2457 | valpuestagerardo@gmail.com | [linkedin.com/in/gerardovalpuesta](https://www.linkedin.com/in/gerardovalpuesta) | gerardovalpuesta.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Engineer with 6+ years of experience building enterprise SaaS platforms, ERP modules, analytics dashboards, and AI automation solutions, combining hands-on development with technical team leadership. Proven track record with Svelte 5 and SvelteKit—including the production migration of an internal platform from Svelte 2 to Svelte 5— alongside Angular, TypeScript, Node.js, Express.js, SQL Server, and Docker. Coordinated engineering teams, conducted pre-merge GitHub code reviews, estimated technical effort, identified security risks, and built autonomous AI agents, n8n automations, and API integrations. Focused on performance, maintainable architecture, and measurable business ROI.

HIGHLIGHTED IMPACT

- **Migrated Chronos**, the company's internal ticket & productivity management platform (Asana-like, used by the entire team), from Svelte 2 to Svelte 5 with SvelteKit, modernizing its routing and reactivity system without interrupting daily operations.
- **Engineered and deployed an autonomous desktop SAT Tax AI Agent** multi-company and multi-RFC (SvelteKit, Svelte, Tauri, Node.js/Express.js) that automates end-to-end CFDI tax voucher workflows: CIEC/e.firma auth, AI CAPTCHA solving, scheduled batch downloads/reconciliation, and accounting-ready package delivery—reducing processing time by 95% (from days to ~5 mins per session). Included an AI Copilot to detect tax risks, assist in bank reconciliation, and generate executive monthly closing reports.

TECHNICAL SKILLS

Full Stack & Frontend: Svelte 5, SvelteKit, Angular, TypeScript, JavaScript, React, Next.js, React Native, Vite, HTML5, CSS, Tailwind CSS, RxJS, PWA (IndexedDB, offline-first), Lazy Loading, Code Splitting, Web Performance Optimization.

Backend & Data: Node.js, Express.js, REST APIs, SQL Server, MongoDB, SQLite, Firebase, JWT Auth, Role-Based Access Control (RBAC), scheduled batch jobs.

Maps & Reports: Mapbox, Leaflet, PDF & Excel report generation.

AI & Automation: AI Automation, AI Agents, n8n, LLMOps, Large Language Models (GPT-4, Claude, Gemini), Model Context Protocol (MCP), Prompt Engineering, Workflow Automation, API Integration, RPA.

DevOps & Tools: Docker, Git, GitHub, Vercel, Railway, Playwright, Tauri, Agile / Scrum.

Technical Leadership: Team coordination, code reviews, sprint estimation & technical planning, security risk identification, version control best practices.

PROFESSIONAL EXPERIENCE

Technical Lead / Full-Stack | Ximplify

2022 - Present | Mexico | Remote | Full-time

Technical leadership and development of enterprise SaaS platforms, ERP modules, AI agents, and automations, leading a 2-developer team while driving hands-on implementation of complex features.

- Led the migration of Chronos, internal Asana-like productivity platform, from Svelte 2 to Svelte 5 with SvelteKit & Vite, integrating TypeScript, Tailwind CSS, and SQL Server, while adopting runes reactivity and native framework routing.
- Redesigned and rebuilt XAMAI Client Portal 2.0 (client management and access enabling for Conta-e, Facture-e) with SvelteKit, Svelte, TypeScript, CSS, Bootstrap, Tailwind CSS, SQL Server, and JWT, achieving a 90% boost in user satisfaction and an 85% initial load speedup via lazy loading and code splitting.
- Developed the SAT Agent, an autonomous AI desktop agent built with Tauri (SvelteKit, Svelte, TypeScript, Tailwind CSS on frontend; Node.js/Express.js and SQLite on backend, containerized with Docker), using Playwright to automate browser workflows (CIEC/e.firma login, CAPTCHA solving, file downloads) in scheduled batch jobs, cutting processing time by 95% and missing vouchers by 100%.
- Coordinated and provided technical mentorship for a 2-developer team over 2.5 years: conducted GitHub code reviews before branch merges, participated in effort estimation under Scrum, and identified security risks (endpoint/route leaks) prior to production deployment.

- Led framework migration from Angular 12 to Angular 17 with RxJS without downtime or user regressions; currently migrating Contae from Angular to Svelte component by component.
- Reduced manual operational overhead by up to 50% by building n8n automation pipelines, MCP servers, and LLM integrations (GPT-4, Claude, Gemini).

Frontend Developer | Stan Semper Crasol

2020 - 2022 | Mexico | Contract

Development of admin interfaces, high-performance landing pages, Android field apps, and real-time logistics dashboards for surveillance and logistics projects.

- Constructed 3 client landing pages in HTML5, CSS, and JavaScript scoring 95+ across all Lighthouse audit categories.
- Developed an offline-first Kotlin Android app for field inspection reports with photo capture, GPS, serial number tracking, and automated Firebase sync generating real-time PDF/Excel reports; winning project for the C5 government tender in 2021.
- Integrated REST APIs, payment gateways (Stripe, OpenPay), Mapbox interactive maps, and real-time logistics dashboards via WebSockets and Bootstrap.

SELECTED PROJECTS

AI WhatsApp CRM: Developed and validated an AI-powered WhatsApp CRM deployed on Vercel to centralize conversations, automate initial qualification, and execute conversational follow-up flows with prospects.

Bolddy - Sports Social Network: Active full-stack development of a cross-platform mobile app in TypeScript for discovering and joining athletic activities, with Node.js, MongoDB, and Railway backend, REST API, JWT auth, Leaflet maps, push notifications, and gamification.

StudioKin - Creative Agency Portfolio: Developed an interactive portfolio for a creative agency with functional client project web demos using Next.js, React, and TypeScript.

PWA Tools (Personal Use):

- **Expense Tracker:** Offline-first PWA in TypeScript and Tailwind CSS with IndexedDB storage, category charts, and monthly budget management.
- **TO-DO connected to Chronos:** Lightweight SvelteKit PWA for logging sprint tasks without accessing the full web platform, speeding up daily team logging.

EDUCATION & FORMATION

B.S. in Computer Systems Engineering | UTEL University | 2022

Software Programming Technician | UTEL University | 2015

Relevant Courses: AI Agents with n8n, MCP, WhatsApp & Voice; Chatbots & Artificial Intelligence; Angular; Modern JavaScript; Tailwind CSS, Next.js & Svelte; SQL Server Transact-SQL; Android with Kotlin; Go for Backend.

LANGUAGES

Spanish: Native | **English:** Intermediate (B1)
